INTRODUCTION

The Thar Car Showroom Dashboard is an interactive Excel dashboard developed to analyze bookings, sales, deliveries, revenue, and customer preferences. It transforms raw data into meaningful insights for better business decision-making.

PROBLEM STATEMENT

- Large volumes of showroom data are difficult to analyze manually.
- Manual reports are time-consuming and prone to errors.
- The dashboard provides quick and interactive insights into business performance.

TECHNOLOGY USED

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Slicers
- Power Query
- Excel Formulas (SUM, COUNT, IF, GETPIVOTDATA)
- Conditional Formatting

DATASET ANALYSIS (RAW DATA)

The dataset contains customer booking and sales information, including:

- Customer ID
- Customer Name
- City
- Booking Date
- Vehicle Variant
- Colour
- Booking Status
- Delivery Status
- Price
- Revenue

Data cleaning included removing duplicates, correcting missing values, formatting dates, and organizing the data into an Excel Table.

DATA PREPROCESSING STEPS

- Data Collection
- Removed Duplicates
- Handled Missing Values
- Data Formatting
- Data Validation
- Converted to Excel Table
- Prepared for Analysis

KEY PERFORMANCE INDICATORS (KPIs)

Include the KPI cards from your dashboard, such as:

- Total Bookings
- Total Revenue
- Total Deliveries
- Delivery Success Rate
- Average Vehicle Price
- Total Customers

Purpose: KPIs provide a quick overview of the showroom's overall performance and help management monitor business growth.

DASHBOARD CHARTS

- Bookings by City: Shows the cities with the highest bookings.
- Revenue by Variant: Identifies the highest revenue-generating Thar variant.
- Booking Status: Displays completed and pending bookings.
- Delivery Status: Tracks successful and pending deliveries.
- Monthly Revenue Trend: Shows revenue performance over time.
- Payment Method / Colour Preference: Highlights customer preferences.

CONCLUSION

The Thar Car Showroom Dashboard transforms raw data into meaningful business insights. It helps monitor bookings, revenue, deliveries, and customer preferences effectively. The dashboard improves reporting accuracy and supports faster decision-making. Overall, it enhances showroom performance through clear and interactive data visualization.

The background features a soft, pastel-colored wash of light blue, pink, and yellow, resembling a watercolor or brushstroke effect. Overlaid on this are several sharp, geometric shapes in various shades of blue, including a large dark blue triangle in the top right and bottom left, and a medium blue triangle in the top right. The text "THANK YOU" is centered in a bold, dark blue, sans-serif font.

THANK YOU
